Hard Skill

- HTML5, CSS3
- JavaScript (ES6)
- Typescript
- Sass
- TailwindCSS
- Bootstrap
- Ajax
- jQuery
- ReactJS, Redux, NextJS
- Python
- Django
- Git and Github
- PostgreSQL, and MySQL
- AWS hosting(EC2, S3, RDS, SSL)
- Numpy, Pandas, and matplotlib
- Tensorflow, and Scikit-learn
- Word, Excel, and PowerPoint
- Adobe Illustrator basics
- Adobe Photoshop basics

About Me

I am an Electronics and Communication Engineering graduate with a fervor for web development. Proficient in Python and Django, I specialize in crafting scalable web applications. My skill set encompasses frontend technologies like HTML5, CSS3, and JavaScript (ES6), along with frameworks such as ReactJS, Redux, and NextJS, and I possess hands-on experience in machine learning with TensorFlow and Scikit-learn. Rooted in a solid engineering foundation and driven by my focus on Python, Django, and AWS, I am eager to contribute my expertise to innovative and dynamic projects that push the boundaries of technology.

Projects

Elhegazi a e-commercial website :

- I used HTML, CSS, JS, Bootstrap, jquery, Python, Django, Ajax, and PostgreSQL for Database, hosted on Amazon AWS(EC2, S3, RDS, SSL), Photoshop, and Illustrator for photos editing.
- Responsive website, ability to search for a product, website registration, and cart mechanism, and the ability to add, modify and delete everything on the site through the owner of the site only without entering the code by the admin panel.

Soft Skill

- Communication
- Teamwork
- Multi-tasking
- Adaptability
- Time Management
- Problem Solving

Languages

- Arabic : native
- English : fluent

Education

- **Institute of Aviation Engineering and Technology**
  Bachelor of electronics and communication engineering
  Completed in 2023

- **Alaskria high school**
  High school degree
  Completed in 2012

Portfolio website :

- I used HTML, CSS, Sass, JS, and Bootstrap.
- That is where I put my previous projects, it had a special fade effect on the opening and on scrolling, and it also provide a special way to show my Projects

- **link** - https://m7mod-hegazy.vercel.app/

WhatsApp clone :

- I used Sass, JavaScript, CSS, HTML, React, TailwindCSS, Firebase
- it's a WhatsApp clone using Firebase to login and a real-time messages using a Google account

- **Github** - https://github.com/M7mod-hegazy/whatsapp-clone

Spotify clone :

- I used Sass, JavaScript, CSS, HTML, React, TailwindCSS, Firebase
- it's a Spotify clone using Firebase to login with a Google account and using Spotify API

- **Github** - https://github.com/M7mod-hegazy/not-spotify

Certificates

Front-End Web Development Professional
by Udacity (13/10/2021)
